Experience

UX Designer

January - April 2020

Arctic Wolf Networks

- Designed a project management tool allowing clients to track network vulnerabilities and fixes on a case by case basis.
- Designed automated workflow for a server reconfiguration page, eliminating copy and paste errors
- Improved usability of webpage containing support documents through a navigation redesign.

UX Designer

May - August 2019

SoulFx Technologies

- Led systems design for a prescription reimbursement program that would increase the sales of name-brand drugs. Created technical documentation (wireframes, system diagrams, user task flows) and regularly met with stakeholders.
- Redesigned documentation annotations to prevent code duplication of conditional templates, reducing development time by 8 hours
- Improved user experience of new and existing projects by improving site navigation and usability through wireframes, prototypes, and user task flows

QA Developer

September - December 2018

The Weather Network

- Collaborated with designers to develop cross-platform microservices using Vue and Nuxt frameworks; reducing cache time from 10 minutes to 30 seconds
- Demonstrated bi-weekly product release in agile environment to stakeholders to receive feedback prior to launching
- Established CI/CD environment by contributing 60% of tests for content management system

Software Developer

January - April 2018

Bronte College

- Designed new features following user constraints and requirements allowing admissions office to have more accurate information when suspending student applications
- Interviewed teachers and administrators to find pain points in system interface; redesigned pages with user end needs in mind
